

How to use the

Michigan Prevention Data Atlas

Free, open access equity data for all 83 Michigan counties, powered by the iRISE™ algorithm.
midataatlas.org

Tool 1

Report Builder

Grant, board and policy reports for one county, or up to four compared side by side.

1

2

3

4

5

6

7

or

Check a county
(up to four)

Pick a report
type

Choose
indicators

Weight the
8 domains

Write a problem
statement

Check issue
areas

Generate,
print or save

Send selections to
the Solution Forge

Tool 2

Senate and House district reports

Inside the Report Builder: the same data for Michigan’s 38 Senate and 110 House districts.

1

2

3

4

or

Pick a chamber:
Senate or House

Choose your
districts

Generate the district
report with iRISE™

Open the MDHHS
dashboard (optional)

Send selections to
the Solution Forge

Tool 3

Solution Forge

Turn a problem into cited solutions at the individual, organizational and structural levels.

1

2

3

4

Name the problem
(500–700 words is best)

Map the intersections:
who carries the burden

Weight the 8 domains
and set community co-design

Generate solutions
and resubmit after edits

Tool 4

County Map

All 83 counties colored by burden level on the indicators you choose.

1

2

3

4

Check one or more
indicators

Read the map:
darker is heavier burden

Hover for the county
name and value

Click up to three counties
to compare and build a report
